

Foreground Speakers

FG30

FG20S

FG15B (Black)
FG15W (White)*

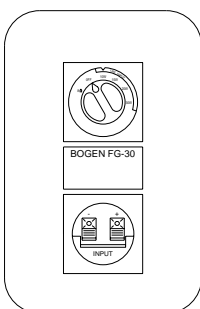

FG15B, FG15W, FG20S, FG30

The FG-Series of 2-way speakers are designed to deliver high-quality, wide frequency response audio in a compact cabinet. Perfect for supplying foreground as well as background music, the speaker line is available in 3 sizes and power ratings. The FG20S has a plastic speaker cone, a splashproof screen, and stainless steel hardware for extra speaker protection and more application uses.

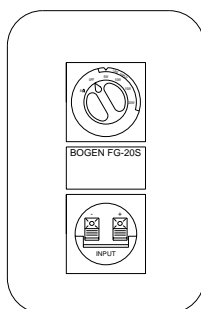

Product Features:

- 15, 20, and 30 watt models
- Smooth, wide frequency response
- Compact and rugged plastic cabinets
- Works with both 70V and 8-ohm speaker systems
- Rotary switch selected power rating for 70V systems
- U-Mounting bracket included
- Splashproof for use in damp environments (FG20S only)
- FG15 available in Black (B) and White (W)

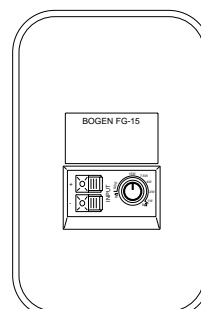

Model	Power Capacity (Watts)		Sensitivity (dBspl @ 1W)	Low-Freq Driver	High-Freq Driver	Dimensions	Weight
	70V Systems	8 Ohms					
FG30	30, 20, 15 & 10	30	86	5" paper	3/4" Mylar	9" x 5-7/8" x 5-5/8"	6 lbs.
FG20S	20, 15, 10 & 5	20	84	5" plastic	3/4" Mylar	9-1/8" x 6-1/4" x 7"	6 lbs.
FG15B	15, 7.5, 4, 2 & 1	15	86	3" paper	3/4" Mylar	7-1/4" x 4-5/8" x 5"	4 lbs.

Smooth Sound

The FG-series of speakers is a great choice for applications where quality sound is of particular importance. These speakers are all 2-way designs with a woofer and tweeter to provide the smooth frequency response demanded of foreground music systems.

System Compatibility

To make these speakers as flexible and easy to use as possible, Bogen designed a rotary switch recessed in the back of the speaker. Its purpose is to allow the 70V power taps to be easily set and changed. So, unlike other speakers, there's no need to dismount the speakers and change the screw terminal connections. Simply reach around back and turn the switch. Because of the excellent sound characteristics of these speakers, they work as well on 8-ohm amplifier systems as they do on 70V systems. To make the speakers compatible with these low-impedance amplifier outputs, simply rotate the switch to the 8-ohm position. With this type of flexibility, you only need one speaker series to cover the entire range of applications.

Outdoor Use

Great sound is in demand any time that people are having fun. For outdoor use, the FG20S splashproof speaker, is an ideal way to provide this sound. With a 5" polycarbonate woofer and mylar tweeter, the FG20S can withstand humidity, moisture, and the occasional dousing from a successful cannonball dive. Corrosion-resistant stainless steel contacts and an epoxy-coated grille ensure years of enjoyment from these speakers.
